- Core Java

## EXPERIENCE

### FULL STACK DEVELOPER

BytesFarms Technology Feb 2023 - Present

#### Frontend Development

- Developed and maintained responsive and high-performance web applications using React, Redux, HTML, and CSS. Collaborated with UI/UX designers and back-end developers to create seamless user experiences.
- Integrated RESTful APIs to fetch and display dynamic data, improving the user interface and experience.
- Worked with version control systems (Git/GitHub) for efficient team collaboration and code management.
- Utilized Material-UI and Bootstrap for consistent and visually appealing design elements.
- Conducted code reviews, identified bugs, and provided solutions for a more robust codebase.

#### Backend Development

- Expertise in server-side development using Node.js.
- In-depth knowledge of the Express.js framework for building scalable and RESTful APIs.
- Database design and management using MySQL, including data modeling and optimization.
- Hands-on experience with SQL queries and database administration tasks.

### PROJECT NEXUM (B2B E-COMMERCE PLATFORM)

Nexum Coffee's B2B Ecommerce Project is a dynamic online platform designed to cater specifically to businesses in the coffee industry. It serves as a centralized hub for coffee sales and listings, facilitating seamless transactions between coffee suppliers and buyers.
